Claim Rejections - 35 USC § 112

1. Claims 35-41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 35, "the wiring portion" lacks antecedent basis.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Application/Control Number: 09/810,615

Art Unit: 2871

Claims 34-41 are rejected under the judicially created doctrine of obviousness-type 3. double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 6330044. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim: a liquid crystal device substrate including a display region in which pixels are formed in a matrix by a plurality of data lines and a plurality of scanning lines, a peripheral driving circuit connected to at least one of the data lines and the scanning lines on an outer peripheral side of the display region, and a plurality of thin film transistors connected to the data lines and the scanning lines, and a liquid crystal held between the liquid crystal device substrate and an opposite substrate; a peripheral partitioning light shielding film formed in an outer peripheral of the display region; a plurality of conductive first light shielding films for shielding respective channel regions of the thin film transistors, the plurality of conductive first light shielding films being formed below at least the respective channel regions of the thin film transistors so as to extend along at least one of the scanning line and the data line; and a constant potential wiring connected to the peripheral driving circuit, the constant potential wiring electrically connected to the conductive first light shielding films, the films are connected to each other and below the peripheral partitioning light shielding film.

Both claim a constant potential wiring is disposed below the peripheral partitioning light shielding film, and an end of the wiring portion is connected to the constant potential wiring.

Both claim the constant potential wiring and the wiring portion are connected to each other via a contact hole.

Both claim the contact hole is positioned below a region of the peripheral partitioning light shielding film in which is extended from a plurality of contact holes is connected to the

data lines and the thin film transistors.

Both claim the constant potential wiring and the wiring portion are connected via a junction electrode.

Both claim the constant potential wiring is connected to a capacitance wiring.

Both claim the capacitance wiring extends parallel to the conductive first light shielding film.

Contact Information

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toan Ton whose telephone number is (703) 305-3489. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308 0956.
